

Whole health for the whole family

ION* Intelligence of Nature is a suite of soil-derived microbiome support products that seek to serve the whole family.

For us, this means pets as well.

Why Gut Support For Pets?

Pesticides in parks.

Chemicals in kibble.

Pets need gut and microbiome support as much as we do.

The problem?

glyphosate and prescription antibiotics

tight junction damage (cellular seals)

leaky gut

inflammation

microbial imbalance

chronic health conditions

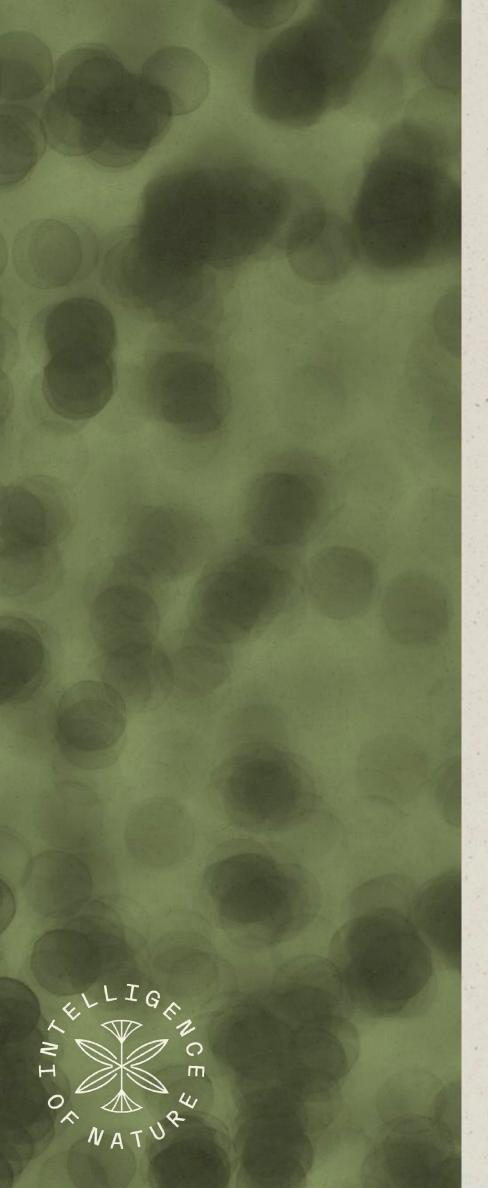

Glyphosate 101

Detrimental herbicide found in Roundup and heavily used in conventional farming.

It has been linked to:

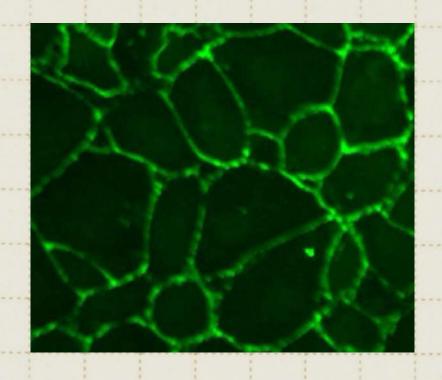

- Non-Hodgkin's Lymphoma
- Non-Alcoholic Fatty Liver Disease
- Endocrine Disruption
- Autoimmune Diseases

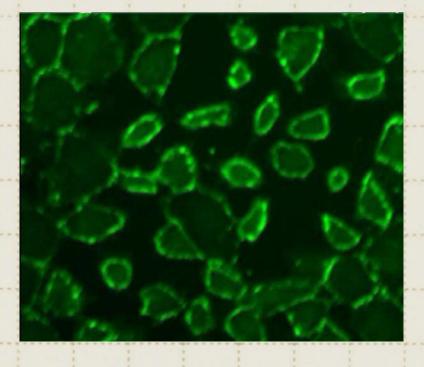

Glyphosate Stats

- o Found in 75% of rain and air samples in much of the U.S.
- Levels of around 3ppb were found in the urine of roughly 93% of Americans (for reference, EU tap water limits are 0.1ppb)
- o 16 times higher levels are found in cat urine.
- o 32 times higher levels are found in dog urine.

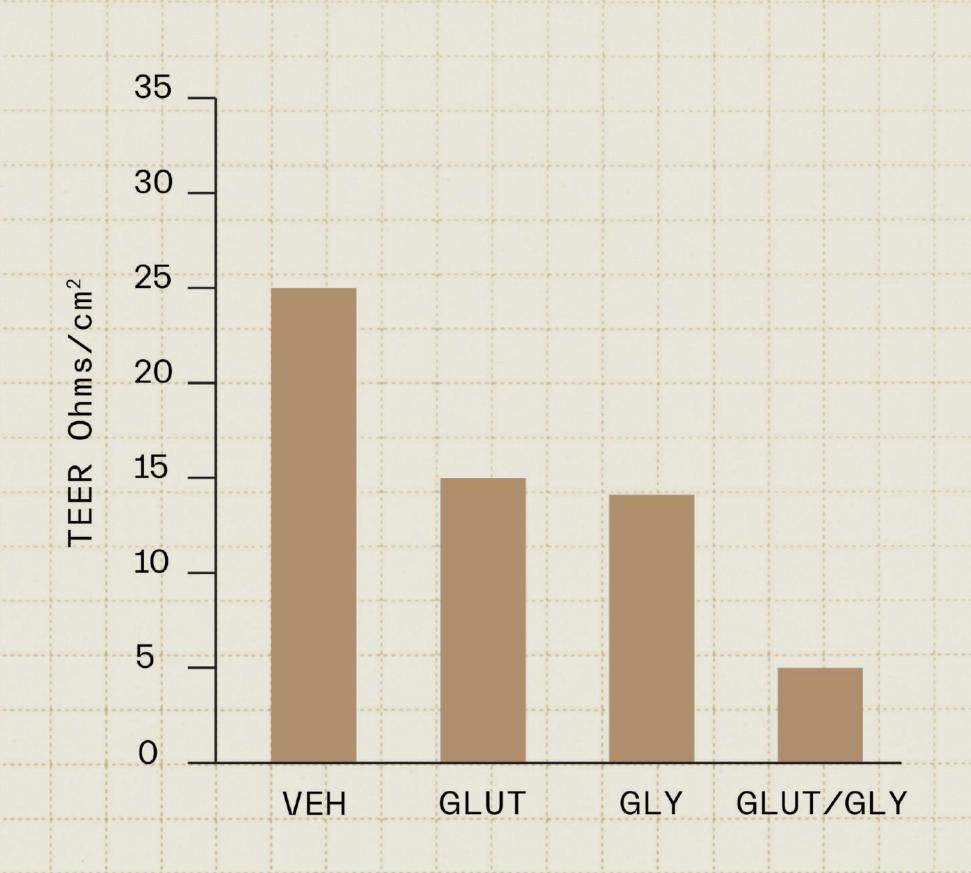

What glyphosate is doing

This is your gut membrane.

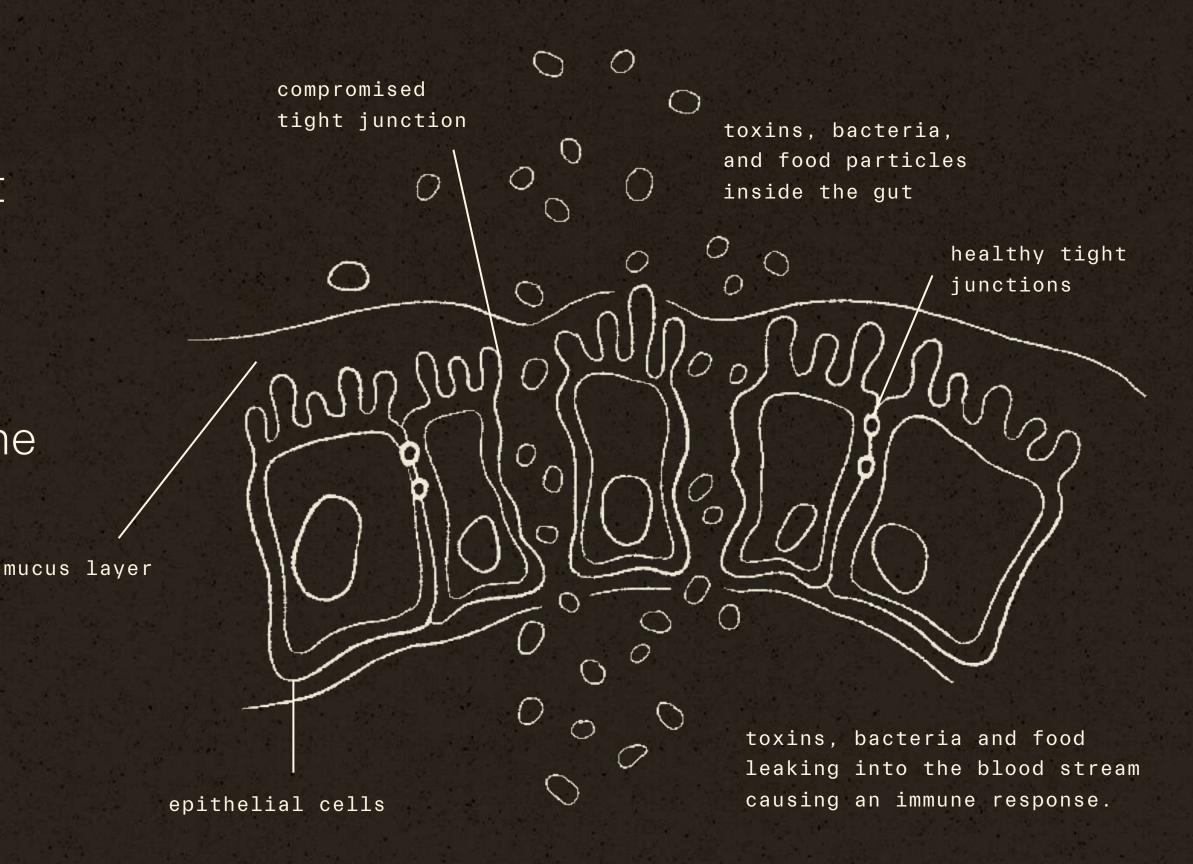

This is your gut membrane on glyphosate.

What are tight junctions?

- Seals in between cells
- Keep toxins/foreign particles out of the bloodstream
- Allow nutrients through
- o Support terrain for the microbiome

Torn tight junctions = leaky gut

Glyphosate exposure tears apart tight junctions

Consistent tight junction injury leads to leaky gut.

Leaky gut is associated with inflammation and chronic health conditions

Leaky gut = dysbiosis

Leaky gut further leads to gut dysbiosis (microbiome imbalance).

Go beyond probiotics

ION* doesn't add "good" bacteria.

ION* supports the terrain where bacteria live.

Leaky gut is associated with inflammation and chronic health conditions.

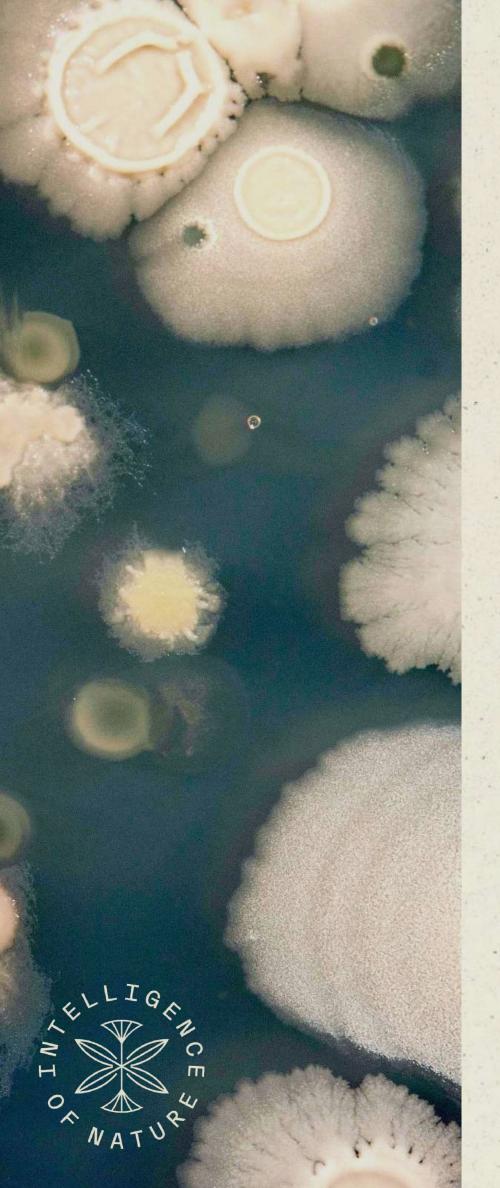

Microbiome is "macro"

Just like for humans, the microbiome of our pets play a macro role in:

- Digestion
- Immune function
- Nutrient absorption

Dysbiosis (an imbalance in the microbiome), on the other hand, can lead to a whole host of problems including but not limited to:

- Diarrhea
- Skin issues
- Gum disease

The true magic? A microbiome that communicates.

The microbiome needs:

- A stable terrain (gut lining)
- Effective communication

Redox signaling is how microbes and host cells:

- Communicate
- Perform essential functions

What is ION* Gut Support for Pets?

- o All natural and derived from ancient soil
- o Consisting of humic extract, purified water, and silicon
- Utilizes potential of bacterial metabolites
- Works via chelation and electron transfer (cellular communication)

Chelation is key

Pronounced "key-lay-tion", we like to see this critical mechanism as "key".

HOOC
$$CH_2OH$$
 CH_2OH CH_2 CH_2 CH_2 CH_2 CH_2 $CHOH$ $CHOH$

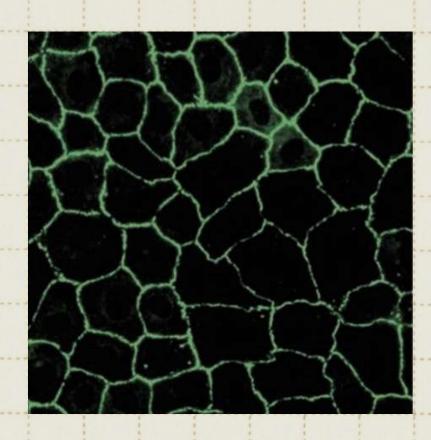

Chelation:

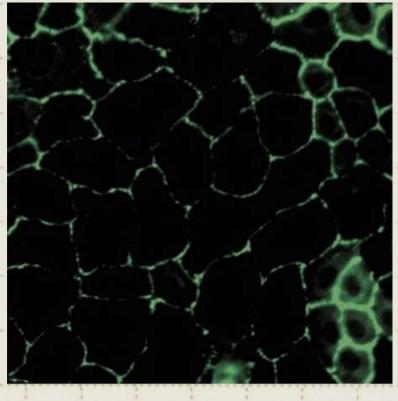

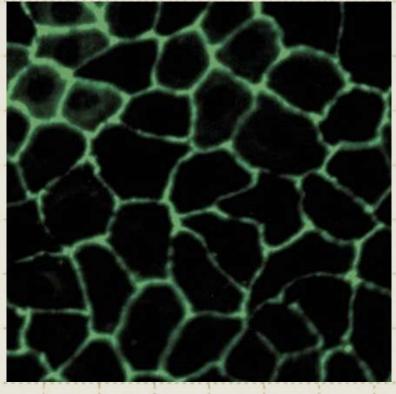

Beyond chelation, tight junctions help us function

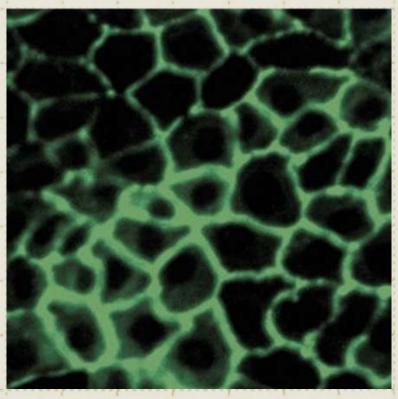

Normal gut lining

Gut lining compromised by glyphosate

Gut lining supported with ION*

Gut lining compromised by glyphosate + supported with ION*

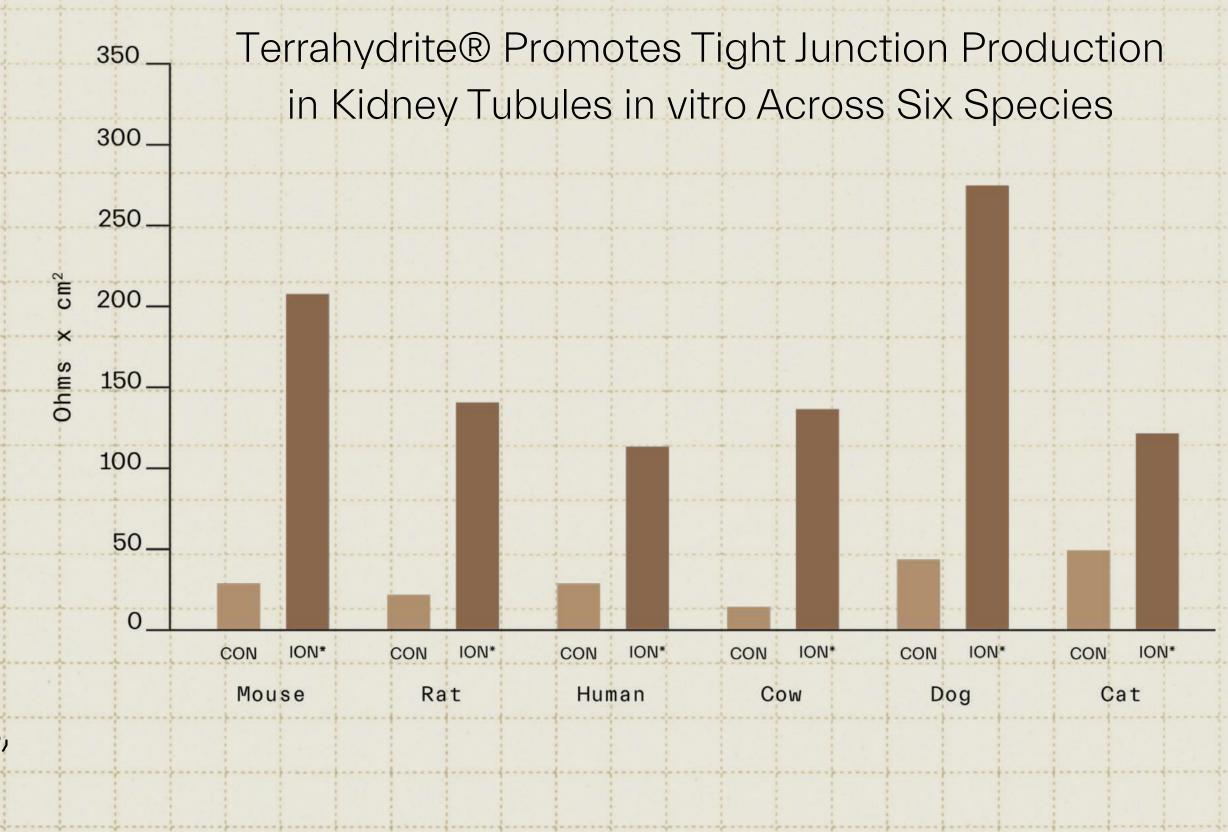

A human formula, with a novel approach

Silicon is added to our pet formula to help with:

- Cellular structure
- Muscular-skeletal structure
- Connective tissue formation

Science

Our pet science shows stark results of membrane integrity across not only cats and dogs, but 6 different species.

ION* Benefits

Starting with a foundation of cellular health leads to:

- Gut lining integrity
- Microbiome support
- Improved digestion
- Enhanced energy
- Immune function

Digestion

Gut inflammation leads to:

- o Gas
- Bloating
- Diarrhea

Gut + microbiome support leads to

- Proper food
- Nutrient absorption
- Healthy waste elimination

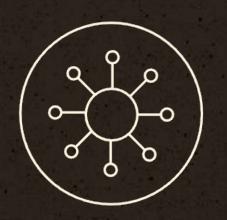

Vitality

- o Energy levels enhanced by nutrient absorption
- Vitamin production is a function of the microbiome

Immune Function

- o 70% of a pet's immune system is in the gut
- Strengthening the gut keeps foreign particles out of the blood
- This reduces chronic inflammatory response

Usage

Directions for use:

Give at mealtime or twice daily in 1/4 cup of dechlorinated water.

o For pet weight:

< 20 lbs.: 1 tsp (5 ml) daily

21 lbs. to 100 lbs.: 2 tsp (10 ml) daily

> 101 lbs: 1 tbsp (15 ml)

Sensitive Usage

Start with 1/8 teaspoon for sensitive pets or for a gentle approach.

Double the usage weekly until your pet is fully benefitting from the recommended usage for their weight category.

Rooted in regulatory practices

Started as a human supplement, ION* Gut Support For Pets adheres to the strictest of measures for FDA compliance.

We are also a proud member of the NASC (National Animal Supplement Council)

We haven't stopped with the microbiome

Our mission is macro.

Just as our passion for root-cause solutions led us to ION*, it has continued to lead us in all aspects of health. We are forging a path to restoration across the planet, and it is critical that our pursuit of health begins with reconnecting to nature.

We are dedicated to supporting a better world for future generations by contributing to Farmer's Footprint.

It's time to get back to nature's way

Farmer's Footprint, a 501(c)(3), is a coalition of farmers, educators, doctors, scientists, business leaders and a passionately engaged community aiming to expose the human and environmental impacts of chemical farming and offering a path forward through regenerative agricultural practices.
